

WDR Announces World Design Rankings in Arts, Architecture and Design

United States takes the first place among 83 represented countries in 2015 with 249 Design Awards won globally.

Como, Italy (DesignPRWire) December 29, 2015 - Today, WDR – World Design Rankings announced the updated design rankings of countries based on the number of design awards won at international juried design competitions and awards. United States ranked as number 1 among the 83 represented countries, followed by Italy, England, Japan, Brazil, China, Germany, Greece, Hong Kong and Turkey which took the top positions in 2014.

World Design Rankings

The WDR – World Design Rankings aims to provide additional data and insights to economists and journalists regarding the state-of-art in design industry. The ultimate aim of the world design rankings is to contribute to global design culture through advocating and highlighting good design. The rankings aim to provide a snapshot of the state-of-art and design potentials of countries worldwide by highlighting their creative strengths, design weaknesses and available opportunities. The “Design Business Insights” section provides a ranking of countries based on their success in diverse design fields and creative categories. Using the “Design Business Insights” section, media members and design lovers could discover leading countries for specific design sectors and get answers to their questions such as “Which country is best in industrial design”, “Which country is best in interior design?”, “Which country is the best in fashion design?” etc.

2015 Rankings Update

Five (5) New countries are included in the 2015 rankings: Pakistan, Bangladesh, Colombia, Swaziland, Qatar and Democratic People's Republic of Korea. Top 10 changed slightly this year; China ascended in the ladder from 7th to 5th position, which moved Great Britain and Japan a step back. Furthermore, Greece joined the Top 10 from the 10th position by pushing down Republic of Korea which now holds the 11th position.

Design Business Insights

Furthermore, for each country, three additional tables for strengths, weaknesses and opportunities are listed. The table of “Design Strengths” displays dominant design fields, in which a country is highly competitive and successful; i.e. for example you could learn whether Italy is better in Fashion Design, Furniture Design or Graphic Design. The “Design Weaknesses” table display design fields that are below average in comparison to other countries. The “Design Opportunities” table display latent design categories that could be further explored by

the country. Using this functionality press members and design enthusiasts could discover more about countries, and understand the importance of diverse design sectors for each country. These insights could also be used by policy makers to determine which specific design sectors or industries could need or receive government subsidies or subvention. To discover the complete list of countries included in the World Design Rankings, and to see in-depth design business insights for each country, interested parties could check the World Design Rankings at <http://www.worlddesignrankings.com>

Category Based Top Designers' List

Parties who are more interested in the success of individual designers than countries should check the "Design Classifications" platform instead. The "Design Classification Platform" ranks designers, artists and architects in hundreds of creative fields and design categories including architecture, interior design, furniture design, fashion design, graphics design and packaging design among others. Using the "Design Classifications" platform, design enthusiasts could get answers to their questions such as "What is the best advertising design agency in the world?", "Who is the worlds' leading architect?", "Who is the best Graphics designer in Japan" etc. The "Design Classifications" platform is therefore ideal for both press members to find excellent designers, artists and architects to feature, and is also a great source for businesses who are actively seeking the top talent in any given design field. Interested parties could discover "Design Classifications" and checkout category based designer rankings at <http://www.designclassifications.com>

Designer Rankings

Parties who are interested only to discover top designers, artists and architects regardless of the design discipline could check the individual and overall rankings of all designers, artists and architects at the Designer Rankings website. The Designer Rankings website provides an overall score and ranking of all designers based on the number of design awards won globally, in more than hundred creative disciplines including product design, graphic design, architecture, interior design, fashion design and service design. One may call that this is the list of "Top Designers". The Designer Rankings are accessible online at <http://www.designerrankings.com>

Digital Press Kit

A digital press kit is available for this release, including heat-map, latest rankings, editorial images for articles as well as logos. Download Digital Press Kit here: <http://www.worlddesignrankings.com/presskit.zip>

Tips for Press Members

When mentioning World Design Rankings, international press members usually feature top countries with a selection of best designers from these countries while local publications feature top designers and their work from their own countries.
